

VISION CARE

The Medina County Career Center's Vision Care program teaches students about common eye disorders, how to test for visual acuity, depth perception and color blindness and proper use of optical instruments, as well as prescription analysis and fitting technologies.

Curriculum

- Anatomy and physiology of the eye
- Preliminary testing
- Basics of ocular surgery
- Ethics and scope of practice
- Private and retail practice
- Use of ophthalmic equipment
- Identification and treatment of ocular injuries
- Fitting technologies
- Local vision/hearing screening
- Outreach service projects
- On-site optical clinic

Students have the opportunity to earn college credits in this program.

Certification*

- CPR/First Aid
- OSHA 10-Hour
- Leadership Excellence

Facilities and Equipment

Students learn in our classroom and retail shop on campus. Some equipment includes:

- Tonometer
- Auto Refractor
- Visual Field Analyzer
- Retinal Camera
- Corneal Topographer
- Lensometer
- Edger

**Students who meet certification criteria will have the opportunity to test in their CT program.*

Some Employment Opportunities

- Optometric assistant
- Ophthalmic assistant
- Optical laboratory technician
- Optical sales representative
- Optometrist
- Ophthalmologist
- Apprentice Optician

Work with a licensed optician for two years and you are eligible to sit for the National Optician Competency Examination (NOCE) and the Contact Lens Registry Examination (CLRE).
